

Region
Västernorrland

A topographic map of the study area, showing elevation contours and a scale bar. The scale bar indicates distances of 0, 1 km, and 2 km. The map shows a river system flowing from the north towards the south, with a large reservoir or lake in the north. The terrain is characterized by various elevation contours, with higher elevations (up to 1000 m) in the north and lower elevations (down to 200 m) in the south. The map also shows a road network and several small settlements.

A topographic map showing contour lines and elevation. The label "Svänglingsb." is visible on the map.
